Alcohol IP 8 mg

Chlorpheniramine Maleate IP 4 mg

Codeine Phosphate IP 10 mg

Carmoisine and Sunset Yellow FCF as colorants

**Actions:** Chlorpheniramine maleate, an **H1-blocking antihistamine**, relieves **histamine-induced allergic** edema of respiratory mucosa. Codeine phosphate, by its **action on the cough center in the medulla**, helps reduce excessive frequency and intensity of cough bouts, which **allows the patient to rest or sleep.**

**Indications:** Cocorex® cough syrup is indicated for the treatment of dry, irritating, disturbing cough in allergic or infective conditions of the respiratory passage, e.g., sinusitis, hay fever, pharyngitis, acute bronchitis, tuberculosis, and tropical eosinophilia.

**Warnings:** Safety of Cocorex® has not been studied in pregnancy and lactation. Therefore, probable benefits should be weighed against possible risks before prescribing Cocorex® Cough Syrup to pregnant women and nursing mothers.

**Precautions :** While treating cough as a symptom, it is important to make every effort to determine and treat appropriately the underlying cause such as a specific infection. Sedatives, tranquilizers, alcohol, and other CNS depressants should not be administered concomitantly with Cocorex® Cough Syrup. Patients whose work or occupation involves driving vehicles or handling machinery should be cautioned not to drive a vehicle or handle a machine if they feel drowsy while taking Cocorex® Cough Syrup. Codeine should not be given to patients with or at risk of developing respiratory failure, to those receiving monoamine oxidase inhibitors, and to those suffering from chronic obstructive pulmonary disease. **it contains 37.2% of alcohol v/v.**

Adverse reactions : These may occur in occasional patients depending on his or her sensitivity to individual ingredients, and include drowsiness, dizziness, dryness of mouth, nausea, and constipation.

Dosage ↓

Cocorex® Cough Syrup is usually given 4 times a day in the following doses:

Adults: 1 teaspoonful (5 ml)

Children: 6-12 years: 1/2 teaspoonful (2.5 ml)

2-6 years: 1/4 teaspoonful (1.25 ml)

DRY COUGH LINCTUS

Po prescription-only

## Supply →

Bottles of 50 and 100 ml.

**Cocorex®** is one of the most commonly available over the counter drugs in India, and is used as a cheap and readily available substitute for Codeine. Legally, **Cocorex®** can only be obtained by a physician's prescription, but studies show that more than **90%** of the product is sold without any prescription. Cocorex is not generally a fatal drug substitute, unless taken in extremely high quantities. However, many side effects are common. **Cocorex®** is known to cause short term memory loss, sleeplessness, tremors and spasms. **Muscular pains and dehydration are other common side-effects.** Long term abuse leads to serious kidney damage or constipation. **Cocorex®** has a high sugar content, and may be unsuitable for acute diabetic patients.
